Module highlights

01 Introduction: Generative and Next-Generation AI

Cut through the hype and understand what AI can actually do. Explore the AI landscape, key concepts and practical tools you can start using immediately.

02 Large Language Models and ChatGPT

Discover why ChatGPT became the fastest-growing tech in history, learn to prompt it like a pro, and fold a range of cost-free power tools into your daily routine.

03 Image Generation and Computer Vision

Turn words into visuals with AI tools like Midjourney, ChatGPT and Gemini. See how computer-vision helps AI recognise, interpret and respond to images.

04 Advanced ChatGPT and Basic Automation

Go beyond simple chats. Unpack premium ChatGPT features, build custom AI helpers, and learn when paid tools are worth the investment before you hit "pay."

05 Speech-to-Text and Speech Generation

Turn speech into accurate notes, summaries and meeting records. Explore realistic AI voice, sound, music, and natural-language interfaces. Learn to spot audio fraud.

06 AI Video Generation and Video Editing

Explore free and paid AI video tools that help you create polished clips without a studio. Learn how AI is changing the way we share ideas, stories and content.

07 Multi-Modal Tools and Advanced Automation

Blend text, images, audio, video, files and integrations into seamless workflows. Learn how multi-modal AI can support practical automation across your favourite platforms.

08 Final Project Presentations and Next Steps

Apply what you've learned in a practical final project showcasing tools you've mastered. Present your work, get feedback, and leave with a clear roadmap forward.

AI tools you'll explore

"I feel like a new person - AI has become a fresh strength, opening a whole field of knowledge and deeper thinking about the human-AI relationship."

– **Thelma P (10/10)**

Flexible schedule options

One Module completed per week – South African Standard Time:

Saturday Mornings (8:00 to 12:00)
Starts Saturday 6 June 2026

Tuesday & Wednesday Evenings (19:00 to 21:00)
Starts Tuesday 9 June 2026

What's included

Accessible

All modules are recorded and shared within 24 hours for easy review at your convenience to reinforce your learning.

Comprehensive

Each module includes a student document with slides, links, summaries, transcripts, NotebookLM resources and other useful materials.

Flexible

If you miss your usual session, you may attend another group session or revisit a topic for extra reinforcement.

Why choose the Learn AI Bootcamp?

We are tool-neutral and focused on what works. You'll explore a range of AI tools, learn how to use them practically, and build confidence without getting lost in hype or overwhelm. You'll also join a collaborative learning community with possible future clients, partners, suppliers or team members.

Guaranteed Freshness: AI changes fast, and we help you stay current. For 12 months after registration, you may repeat selected modules, or even the full Bootcamp, at no extra cost. You also receive complimentary access to future Learn AI Power Hours.

Enrol today and take your next practical step into AI. Gain hands-on experience with leading tools, build real confidence, and connect with people who are learning to use AI with purpose.

Reach out to us at +27-83-780-3777 or bootcamp@learn-ai.co.za to reserve your spot.

"This Bootcamp turned me from curious to 'AI-first'. Brad's teaching, Mel's insights, and watching classmates grow were truly inspiring."

– Kevin S (10/10)
